iOS Application

Privacy policy

What data is collected by the application ?

The application does not collect any data from the user. It only allows the user to transform a text input by the user.

The application never knows nor stores what text is typed by the user.

What data is collected by other parties in the application ?

There is a ad banner at the bottom of the app's main view that is handled by Google via the Google Mobile Ad SDK. This banner collects data in order to know some marketing related data that help the banner work in order to show an advertisement

How is the user data collected ?

You will find everything related to user data usage at this page :
https://developers.google.com/admob/ios/data-disclosure

Need assistance ?
